MyChart Message for April 22, 2020

SUBJECT: Visit with your doctor by video or phone

Dear Patient,

Beaver is expanding our internet video and phone medical visits to make it easier to talk to a doctor from the comfort of home. If your doctor feels an in-person follow-up is needed, we can help schedule that, too, at one of Beaver's appointment-only locations.

The good news is that if you'd like to schedule a video or phone consultation now, it won't cost you anything out-of-pocket. In order to help you stay in touch with your doctor, Beaver has decided to waive patient co-pays on video and phone visits during the pandemic. If your doctor does decide that you should come in for a follow-up, there is still the standard co-pay for office visits.

You can make your appointment through MyChart or by calling your Primary Care Physician.

And as always, our urgent care locations are open.

If you are currently experiencing moderate to severe respiratory illness symptoms including fever, cough, and/or shortness of breath, please contact your primary care physician by phone to evaluate whether you need for more immediate medical attention and find out if testing for COVID-19 may be warranted.

For 75 years, Beaver Medical Group has worked hard to make sure our community gets the care it needs. That commitment to caring for the health and safety of our patients is more important now than ever.
